What You Get with Custom Checkout Fields Pro

Pro Features · https://wpfactory.com/docs/pro-feature-breakdown/

The Pro version of Custom Checkout Fields for WooCommerce lifts the free version's single-field limit so you can build a complete checkout form. This page explains what Pro unlocks and how to use it.

The one thing Pro changes

In the free version, the **Custom fields number** setting on the General tab is locked to `1`. Pro makes it editable, with a range of 1 to 100. Set the number, click **Save changes**, and a new **Field #2**, **Field #3**, and so on tab appears, each with the same full set of options as Field #1.

Every field keeps the full option set

There is no reduced "extra field" here. Each of your up to 100 fields supports:

- Any of the 19 field types, including datepicker, timepicker, select, multiselect, radio, country, and state.
- Placement in the Billing, Shipping, Account, or Order notes section with a priority.

- Visibility rules by category, tag, product, user role, cart amount, shipping class, country, or another field's value.
- A fixed or percent fee triggered when the field is filled in.
- Input limits, styling classes, and prepopulate-from-account behavior.

Set it up

1. Go to **WPFactory > Custom Checkout Fields** (also reachable at **WooCommerce > Settings > Custom Checkout Fields**).
2. On the **General** tab, set **Custom fields number** to how many fields you need.
3. Click **Save changes**. New field tabs appear.
4. Configure each new field on its own tab.

Typical uses for multiple fields

- A delivery date field plus a delivery time field plus a "leave at door" checkbox.
- Separate billing and shipping instructions.
- Several optional paid add-ons, each with its own fee.

CUSTOM CHECKOUT FIELDS FOR WOOCOMMERCE

Upgrading to Custom Checkout Fields Pro unlocks up to 100 fields, each with the complete option set.
