URL Coupons: Free vs Pro Versions Compared

Pro Features · https://wpfactory.com/docs/pro-vs-free-versions-copons/

Difference between the Pro and free versions

This page compares the free and Pro versions of Coupons & Add to Cart by URL Links for WooCommerce, so you can see exactly what upgrading unlocks. The boundary below is taken from the plugin itself: in the free version the Pro-only fields are present but greyed out, and the Pro version enables them.

Most of the plugin is free, including applying coupons by URL, delaying coupons, hiding the coupon field, sessions and caching options, data storage, and the Javascript reload. Pro focuses on add-to-cart coupons, redirects, and custom notices.

Feature	Free	Pro
Apply standard coupons by URL	Yes	Yes
Custom URL coupon key	Yes	Yes
Force session start (guests and cached sites)	Yes	Yes
Delay coupon until a product is added	Yes	Yes
Hide the coupon field on cart and checkout	Yes	Yes
Delay notice	Yes	Yes
Save coupons on empty cart	Yes	Yes
Payment request button coupons (Stripe, WooCommerce Payments)	Yes	Yes

Feature	Free	Pro
WP Rocket compatibility, Javascript reload, hook and data storage options	Yes	Yes
Add "Fixed product discount" coupon products to the cart	No	Yes
Redirect after applying (cart, checkout, custom URL)	No	Yes
Redirect URL per coupon	No	Yes
Custom notice and notice per coupon	No	Yes
`[alg_wc_url_coupons_print_notices]` shortcode	No	Yes

URL COUPONS

If you need add-to-cart coupons, redirects, or custom per-coupon notices, upgrading takes a couple of minutes.
