Product-Specific Limits Apply to the Whole Store

Troubleshooting · https://wpfactory.com/docs/product-limits-not-working/

Per-product limits seem to apply to every product

If a per-product limit in Maximum Products per User for WooCommerce applies to every product or has no effect, you are on the free version or the Pro per-product options are off. With Pro active, go to WPFactory > Max Products per User > Limits, enable Per product, then set Limit per user on the product.

Symptoms

- A limit applies to all products instead of the one you targeted.
- The per-product **Limit per user** field is missing, or setting it changes nothing.

Cause

Per-product and per-category/tag limits are Pro features. The free version applies limits at the store-wide (All Products) level only. If you only see the All Products limit, you are on the free version or the Pro per-product options are not enabled.

Fix

1. Confirm you have the Pro version active under **Plugins**.
2. Go to **WPFactory > Max Products per User** (also reachable at **WooCommerce > Settings > Maximum Products per User**) and open the **Limits** section.
3. Enable **Per product** (or **Per product category** / **Per product tag**).
4. Edit the product (or term) and set its **Limit per user**, then save. A per-product value of `0` falls back to the All Products limit.

5. Test with a non-admin account: add the product to the cart and confirm the limit is enforced. Clear any page or object cache if results look stale.

> **Tip:** to limit many products at once, group them in a category or tag and set the limit on that term rather than editing each product.
