Product Notes Settings Reference

References · https://wpfactory.com/docs/product-notes-settings-reference/

This reference lists every setting in Product Notes Tab & Private Admin Notes for WooCommerce with its label, option ID, default and Free/Pro status. All settings live at **WPFactory > Product Notes** (also reachable at **WooCommerce > Settings > Product Notes**), split into Private notes, Public notes and Advanced sections.

How option IDs are built

The Private notes and Public notes sections share the same options. In the tables below, `{type}` is `private` or `public`, so `alg_wc_pn_{type}_enabled` means `alg_wc_pn_private_enabled` in the Private notes section and `alg_wc_pn_public_enabled` in the Public notes section. Options marked "Public only" exist only in the Public notes section.

Section and General Options

Label	Option ID	Default	Free/Pro
Private notes / Public notes: Enable section	`alg_wc_pn_{type}_enabled`	Yes	Free

Tools

Tick a tool and click **Save changes** to run it. The box clears itself after running. There is no undo.

Label	Option ID	What it does	Free/Pro
Products: Delete	`alg_wc_pn_{type}_tool_delete_all`	Deletes all notes of this type for all products	Free
Orders: Add	`alg_wc_pn_{type}_tool_add_order`	Adds product notes to all orders items meta	Pro
Orders: Delete	`alg_wc_pn_{type}_tool_delete_all_order`	Deletes all product notes from all orders items meta	Pro

Advanced section

Label	Option ID	Default	Free/Pro

WPML: Use default language product ID	`alg_wc_pn_wpml_use_default_language_product_id`	No	Free

With the WPML option on, translated products show the notes saved on the product in your default language in the product tab, product meta, single product and shop page positions and the Pro export, so you only enter those notes once.

Formatting Options

The Advanced section lists formatting options for every position that is currently enabled; disabled positions are hidden. Each position stores its options in one array: `alg_wc_pn_{type}_product_tab_options` for the product tab and `alg_wc_pn_{type}_{position}_formatting_options` for the others (for example `alg_wc_pn_public_cart_formatting_options`).

Label	Array key	What it does
Process shortcodes	`do_shortcode`	Runs shortcodes inside notes
Escape HTML	`do_esc_html`	Shows HTML in notes as plain text instead of rendering it
Replace line breaks	`do_wpautop`	Turns line breaks into paragraphs
Convert plaintext URI to HTML links	`make_clickable`	Makes URLs in notes clickable
Notes glue	`glue`	Text placed between multiple notes
Content	`content`	Wrapper around the notes; `%product_notes%` is replaced with the notes. Not shown for single product and shop pages, which use the content boxes in Frontend Options

Formatting defaults by position

Position	Escape HTML	Replace line breaks	Clickable links	Glue	Content
Product tab, Admin orders	Yes	Yes	Yes	` `	`%product_notes%`
Product meta	No	No	Yes	` `	`<span class="posted_in">%product_notes%</span>`
Single product page, Shop pages	No	No	Yes	` `	Set per position in Frontend Options
Variation description	No	No	Yes	` `	`<p>%product_notes%</p>`
Cart, Checkout	No	No	Yes	` `	`<div>%product_notes%</div>`
Admin products list column	Yes	No	Yes	` `	`%product_notes%`
Admin emails, Customer emails	No	No	No	`</li><li>`	`<ul class="wc-item-meta"><li>%product_notes%</li></ul>`
Export	Yes	No	No	`;`	`%product_notes%`
WooCommerce PDF Invoices & Packing Slips	Yes	No	No	` `	`<small>%product_notes%</small>`

Process shortcodes is off by default everywhere.

Reset Settings

Every section ends with **Reset section settings** (option ID `alg_wc_product_notes_{section}_reset`). Tick it and save to restore that section's defaults. It resets settings only; your notes are not touched.
