# Quantity Manager: Message Placeholders Reference

References · https://wpfactory.com/docs/quantity-manager-message-placeholders-reference/

## Message placeholders reference

Every notification message in the Min Max Step Quantity Limits Manager for WooCommerce supports placeholders that are replaced with live values when the message is shown. Each message field lists the placeholders it accepts directly beneath it; this article collects them in one place.

### Minimum quantity messages

| Placeholder | Replaced with |
|---|---|
| `%min_cart_total_quantity%` | The required cart-total minimum. |
| `%cart_total_quantity%` | The customer's current cart total. |
| `%min_per_item_quantity%` | The per-item minimum. |
| `%item_quantity%` | The current item quantity. |
| `%product_title%` / `%category_title%` / `%attribute_title%` | The product, category or attribute name (per-scope messages). |

### Maximum quantity messages

Use `%max_cart_total_quantity%`, `%cart_total_quantity%`, `%max_per_item_quantity%`, `%item_quantity%`, and `%product_title%` / `%category_title%` / `%attribute_title%` in the matching maximum-quantity messages.

## Step quantity messages

| Placeholder | Replaced with |
| --- | --- |
| `%quantity_step%` | The step value. |
| `%quantity%` | The current quantity. |
| `%remaining_to_next%` | How many more units reach the next valid step. |
| `%next%` | The next valid step quantity. |
| `%step_cart_total_quantity%` | The cart-total step value. |

## Fixed (allowed/disallowed) quantity messages

Use `%allowed_quantity%` or `%disallowed_quantity%`, `%quantity%`, and the relevant title placeholder (`%product_title%`, `%category_title%`, `%attribute_item_title%`).

## Default quantity messages

Use `%default_per_item_quantity%`, `%item_quantity%` and `%product_title%`.

## Total price by quantity template

The Total Price by Quantity template accepts `%price%`, `%qty%`, `%unit%` and the expression form `{{%qty / %quantity_step}}`. The `%unit%` value is read from product level first, then category level, then the global label.

## Buy all stock messages

QUANTITY MANAGER

See every feature and the pricing on the Quantity Manager plugin page.

**View plugin →**

The success message accepts `%qty%` and `%product_title%`.
