Recalculate WooCommerce Analytics for Converted Orders

How to · https://wpfactory.com/docs/recalculate-woocommerce-analytics/

To recalculate WooCommerce Analytics for converted orders in Payment Gateway Currency for WooCommerce, go to WPFactory > Payment Gateway Currency > Convert Currency > Admin, tick Orders and Revenue in the WooCommerce Analytics group, and save. The Orders and Revenue reports then use each order's stored conversion rate to show values in your shop currency.

Where the setting lives

Go to **WPFactory > Payment Gateway Currency** (also reachable at **WooCommerce > Settings > Payment Gateway Currency**), open the **Convert Currency** sub-tab, then the **Admin** section. The **WooCommerce Analytics** group is at the bottom.

Turn it on

1. In the **WooCommerce Analytics** group, tick **Orders and Revenue: Recalculate values from the orders and revenue tabs based on the conversion rate** (`alg_wc_pgbc_convert_currency_analytics_orders_and_revenue`).
2. Click **Save changes**.
3. Open **Analytics** in the WooCommerce menu and check the **Orders** and **Revenue** reports.

If the numbers do not refresh

WooCommerce Analytics caches its report data. If the figures do not update after you save, clear the analytics cache at **WooCommerce > Status > Tools**, then reload the report.

PAYMENT GATEWAY CURRENCY FOR WOOCOMMERCE

Recalculated analytics keep your reporting honest once you are converting currencies at checkout. Extend that to every payment method by unlocking all gateways in Payment Gateway Currency for WooCommerce Pro.
