Restrict Currency Options for Payment Gateways

How to · https://wpfactory.com/docs/restrict-payment-currencies/

Restrict a payment gateway to selected currencies

To restrict a payment gateway to selected currencies in Payment Gateway Currency for WooCommerce, go to WPFactory > Payment Gateway Currency > Restrict Currency, tick Restrict currency, fill in Allowed currencies, Denied currencies, or both for each gateway, and save. This mode shows or hides gateways by store currency without converting prices.

Where to find it

Go to **WPFactory > Payment Gateway Currency** (also reachable at **WooCommerce > Settings > Payment Gateway Currency**), then open the **Restrict Currency** tab.

Set it up

1. Tick **Restrict currency** (the "Enable section" checkbox, stored as `alg_wc_payment_gateways_by_currency_plugin_enabled`, default `No`).
2. For each gateway, fill in **Allowed currencies**, **Denied currencies**, or both.
3. Save changes.

Allowed vs Denied

Field	Stored key	Behavior
Allowed currencies	`alg_wc_payment_gateways_by_currency_incl[{gateway}]`	The gateway shows ONLY for the selected currencies. Empty means the field is ignored.
Denied currencies	`alg_wc_payment_gateways_by_currency_excl[{gateway}]`	The gateway is hidden for the selected currencies. Empty means the field is ignored.

> **Note:** these fields store legacy option keys (`alg_wc_payment_gateways_by_currency_*`) rather than the `alg_wc_pgbc_*` prefix used elsewhere. The labels in the admin read "Allowed currencies" and "Denied currencies".

Example

To accept Direct bank transfer and Cash on delivery only in USD and EUR, set both gateways' **Allowed currencies** to USD and EUR. When the store currency is anything else, those gateways disappear at checkout.

Before you start

- The available currency choices come from WooCommerce (**WooCommerce > Settings > General > Currency**) and your currency switcher, not from this plugin.

- The free version restricts the five standard gateways (Direct bank transfer, Check payments, Cash on delivery, PayPal, WooCommerce PayPal Payments). Other gateways need Pro.

PAYMENT GATEWAY CURRENCY FOR WOOCOMMERCE

Restricting the standard gateways is free. Payment Gateway Currency for WooCommerce Pro lets you set allowed and denied currencies for any gateway on your store.
