How to Customize the Sales Bump Popup Design and Texts

How to · https://wpfactory.com/docs/sales-bump-popup-design-texts/

To customize the popup design, open **WPFactory > Upsell, Cross-sell & Related Products Popup Pro > Style** in WooCommerce Sales Bump: Upsell, Cross-sell & Related Products Popup and set **Popup window width**, **Popup margin top** and **Border radius**. Popup texts such as View Your Cart and Checkout change through translation, and the heading through a WooCommerce filter.

Steps

1. Go to **WPFactory > Upsell, Cross-sell & Related Products Popup Pro** and open the **Style** tab.
2. In **Popup window width**, enter a CSS width such as `700px` or `60%`.
3. In **Popup margin top**, enter a value such as `80px` to move the popup layer down, for example below a sticky header.
4. In **Border radius**, enter a value such as `12px` to round the corners.
5. Click **Save changes**, clear any page cache, and open the popup on your store to check the result.

Style options

Label	Option ID	Default	What it changes
Popup window width	`WebdWoocommerceCrosellPopupPropopupWidth`	Empty (80% wide, 90% on screens up to 767px)	Width of the white popup box. A value you enter applies on all screen sizes.
Popup margin top	`WebdWoocommerceCrosellPopupPropopupMarginTop`	Empty	Moves the whole popup layer, including the dark backdrop, down from the top of the window. The box already sits 100px below the top of that layer.
Border radius	`WebdWoocommerceCrosellPopupProborderRadius`	Empty (square corners)	Rounds the corners of the popup box.

To undo your changes, tick **Reset section settings** at the bottom of the Style tab and click **Save changes**.

Change the popup texts

Text	Where it appears	How to change it
You may also like…	Heading of the shop page popup. On product pages the heading comes from your theme's upsells section (or “Related products” for the fallback).	The WooCommerce filter `woocommerce_product_upsells_products_heading`, or translate the `woocommerce` text domain

Text	Where it appears	How to change it
View Your Cart	Link at the top of the popup and under the product page Add to cart button	Translate the `wpfactory-wc-ucr-pro` text domain
Checkout	Link at the top of the popup	Translate the `woocommerce` text domain

A translation plugin such as Loco Translate lets you change these strings without code, even for an English store. A heading filter example is in the Sales Bump Developer Reference.

Go further with custom CSS

Colors, shadows and spacing have no settings, but the popup uses stable CSS classes. Add rules like these in your theme's Additional CSS area:

```
/* Darker backdrop */
.woocommerce .up-sells {
  background-color: rgba(0, 0, 0, 0.6);
}
/* Popup box: shadow and extra padding */
.woocommerce .up-sells .wrapper {
  box-shadow: 0 10px 30px rgba(0, 0, 0, 0.25);
  padding: 32px !important;
}
/* Close button color */
.woocommerce .up-sells .close {
  color: #333333;
}
```

Sales Bump sets the box margin and padding with `!important`, so padding overrides need `!important` too.

FAQ

Can I change the popup colors from the settings?

No. The Style tab covers width, top margin and border radius. Use the CSS classes above for colors and shadows.

Does my width setting apply on phones?

Yes. A width you enter replaces both the 80% desktop default and the 90% small screen default, so percentage values usually work best on mobile.

Why don't my style changes show on the store?

Sales Bump prints the style rules in the page footer, so a cached page keeps the old look. Clear your page cache and browser cache after saving.

Can I change the cart and checkout icons?

The icons are Font Awesome 4 icons loaded by Sales Bump (`fa-shopping-cart` and `fa-credit-card`). You can restyle or hide them with CSS on `.woocommerce .up-sells .links .fa`.
