Per-Product Quantity Fields Are Not Available

Troubleshooting · https://wpfactory.com/docs/sold-individually-unavailable/

Per-product quantity fields are missing

If a product's edit page has no minimum, maximum, step, default or fixed quantity field, it is because the matching "Per product" toggle in the Min Max Step Quantity Limits Manager for WooCommerce is not enabled. Per-product minimum, maximum and step are free; per-product default and fixed quantities are Pro.

Fix

1. Confirm you are running Quantity Manager **Pro**. In the free version, only store-wide (All products) values are available.
2. Go to **WPFactory > Quantity Manager** and open the relevant section (for example Minimum Quantity).
3. Tick **Per product** and save. This adds the field to each product's edit page.
4. Edit a product and set its value there.

> **Tip:** WooCommerce's own "Sold individually" checkbox (product **Inventory** tab) is always available and does not require Pro.

Need per-product default or fixed quantities, or per-category and per-attribute rules? Get Quantity Manager Pro.
