How to Rename, Reorder or Remove Standard WooCommerce Product Tabs

How to · https://wpfactory.com/docs/standard-tabs/

Customize the standard WooCommerce product tabs

The **Standard Tabs** section of Additional Custom Product Tabs for WooCommerce lets you rename, reorder or remove the three tabs WooCommerce shows on every product page: **Description**, **Additional information** and **Reviews**. This is free.

Where to find it

Go to **WPFactory > Product Tabs** (also reachable at **WooCommerce > Settings > Product Tabs**) and open the **Standard Tabs** section.

Options for each standard tab

At the top, **Standard product tabs** (`alg_wc_product_tabs_standard_tabs_enabled` , default `Yes`) enables the whole section. Below it, each of the three tabs has the same three settings.

Setting	Option ID (Description tab)	Default	What it does

Title	`alg_product_info_product_tabs_description_title`	(empty)	Sets a new tab title. Leave blank to keep the WooCommerce default. You can use shortcodes here.
Position	`alg_product_info_product_tabs_description_priority`	10	A number that sets the order of the tab. Lower numbers appear first. Type a value: this is a number field, not drag and drop.
Remove	`alg_product_info_product_tabs_description_disable`	No	Removes the tab from the product page for all products.

The Additional information and Reviews tabs use the same option names with `additional_information` and `reviews` in place of `description`. Their default positions are **20** and **30**.

Default positions at a glance

Tab	Default position
Description	10
Additional information	20
Reviews	30

Shortcodes in the title

The **Title** field accepts shortcodes, so you can pull in live product data. For example, `[alg_wc_pt_product_function name="get_name"]` outputs the product name. See the full product tabs shortcodes reference for every option.

Reset the section

Each section has a **Reset section settings** checkbox at the bottom. Tick it and save to restore that section to its defaults.

Troubleshooting

- **A renamed tab still shows the old title:** clear any page cache after saving.
- **The Reviews tab did not disappear:** the Reviews tab only appears when reviews are enabled in **WooCommerce > Settings > Products**. Removing it here hides it when it would otherwise show.

PRODUCT TABS

Customizing the standard tabs is free. Additional Custom Product Tabs for WooCommerce Pro adds unlimited custom tabs on top of the built-in ones.
