Stock Manager Settings Reference

Settings Guide · https://wpfactory.com/docs/stock-manager-settings-reference/

This reference lists every setting in Products Stock Manager with Excel for WooCommerce, with its option ID, default and edition. All settings are on one form at **WPFactory > Stock Manager > Settings**, which you can also reach from the **Settings** link under the plugin on the Plugins screen. Only administrators can save them.

How to change Stock Manager settings

1. Go to **WPFactory > Stock Manager**.

2. Click the **Settings** tab.
3. Change the options you need.
4. Click **Save Changes**.

Every option ID starts with the prefix `stockManagerWooCommercePro`. Defaults were verified against Stock Manager Pro 4.0.3. The Free/Pro column follows the plugin's readme, because the free edition's code was not available for this review.

Column mapping

Leave a column field on **Select...** to use the default letter from the sample file.

Label	Option ID	Default	Free/Pro
Product ID Excel Column Letter	`stockManagerWooCommerceProidColumn`	Select... (column A)	Pro
SKU Excel Column Letter	`stockManagerWooCommerceProskuColumn`	Select... (column B)	Pro
Stock Number Excel Column Letter to update	`stockManagerWooCommerceProstockNumberColumn`	Select... (column E)	Pro
Stock Status Excel Column Letter to update	`stockManagerWooCommerceProstockStatusColumn`	Select... (column F)	Pro
Regular Price Excel Column Letter to update	`stockManagerWooCommerceProregularPriceColumn`	Select... (column C)	Pro
Sale Price Excel Column Letter to update	`stockManagerWooCommerceProsalePriceColumn`	Select... (column D)	Pro

Column letters from A to BZ are available. If you set the SKU column to A, product IDs are ignored and every row is matched by SKU.

What to update

Label	Option ID	Default	Free/Pro
Update Stock Number	`stockManagerWooCommerceProupdateStockNumber`	Off	Free and Pro
Add Stock for same Product from multiple Excel Rows	`stockManagerWooCommerceProaddStockNumber`	Off	Free and Pro
Update Stock Status	`stockManagerWooCommerceProupdateStockStatus`	Off	Free and Pro
Update Regular Price	`stockManagerWooCommerceProupdateRegularPrice`	Off	Free and Pro
Update Sale Price	`stockManagerWooCommerceProupdateSalePrice`	Off	Free and Pro

A checked box is saved as `yes`. With all four update boxes off, an upload changes nothing, even though each row reports "updated successfully".

Report

Label	Option ID	Default	Free/Pro
Low Stock Value Identifier for Reports	`stockManagerWooCommerceProlowStockValue`	Empty (5 is used)	Free and Pro

Scheduled import (cron)

Label	Option ID	Default	Free/Pro
Auto Import with Cron	`stockManagerWooCommerceProautoimport`	Not saved (the dropdown shows Yes first)	Pro

Label	Option ID	Default	Free/Pro
Remote Excel URL	`stockManagerWooCommerceProimportUrl`	Empty	Pro
Auto Import Frequency	`stockManagerWooCommerceProimportFrequency`	Select... (no schedule)	Pro
Auto Import Time	`stockManagerWooCommerceProimportTime`	Empty (first run at save time)	Pro
Setting Zero Stock for All Products before Cron Update	`stockManagerWooCommerceProsetZeroStock`	Off	Pro

Frequency values: `1min`, `5min`, `10min`, `30min`, `1hour`, `6hours`, `12hours`, `daily`, `weekly`, `monthly`. Auto Import Time is read in UTC. See how to schedule automatic stock updates.

Manual update

Label	Option ID	Default	Free/Pro
Setting Zero Stock for All Products before Manual Update	`stockManagerWooCommerceProsetZeroStockManual`	Off	Pro

Both zero stock options set `_stock` to 0 and the stock status to Out of stock on every product (any status) before the file is read. Variations are not reset individually.

STOCK MANAGER

Column mapping, scheduled imports and zero stock resets are part of Products Stock Manager with Excel for WooCommerce Pro. Compare editions in Stock Manager Free vs Pro.
