How to Change the Size and Shape of WooCommerce Variation Swatches

How to · https://wpfactory.com/docs/style-and-resize-variation-swatches-css/

To change the size and shape of swatches from Variation Swatches for WooCommerce - Color & Image Swatches, add CSS in Appearance > Customize > Additional CSS or your child theme's stylesheet. Target .alg-wc-civs-term for a single swatch, which defaults to 36px with a 2px solid #ccc border. The plugin has no appearance settings.

Where to add the CSS

Put these rules in **Appearance > Customize > Additional CSS**, or in your child theme's stylesheet. Nothing here touches the plugin files, so updates will not overwrite your changes.

The classes to target

Selector	What it is
`.alg-wc-civs-attribute`	The container that holds one attribute's swatches
`.alg-wc-civs-term`	A single swatch. Defaults: `min-width` and `height` 36px, 2px solid #ccc border
`.alg-wc-civs-term.color`	A color swatch
`.alg-wc-civs-term.image`	An image swatch
`.alg-wc-civs-term.label`	A label (text) swatch. Default font size 17px
`.alg-wc-civs-term.active`	The currently selected swatch (darker border plus shadow)
`.alg-wc-civs-term.disabled`	A swatch dimmed by the Pro "Only valid combinations" option

Selector	What it is
`.alg-wc-civs-term-pointer`	The small underline shown under the selected swatch (Pro)

Make the swatches bigger

```
.alg-wc-civs-term {
    min-width: 48px;
    height: 48px;
    line-height: 44px; /* keep label text centered vertically */
}
```

Make color swatches round

```
.alg-wc-civs-term.color {
    border-radius: 50%;
}
```

Round image swatches with softer corners

```
.alg-wc-civs-term.image {
    border-radius: 8px;
}
```

Restyle the label buttons

```
.alg-wc-civs-term.label {
    font-size: 15px;
    padding: 0 12px;
    border-radius: 4px;
    background: #f4f5f7;
}
```

Change the selected-swatch highlight

```
.alg-wc-civs-term.active {
    border-color: #2271b1;
```

```
    box-shadow: none;
}
```

Adjust the spacing between swatches

```
.alg-wc-civs-attribute .alg-wc-civs-term {
    margin-right: 10px;
}
```

> **Note:** if a rule seems to have no effect, your theme's own styles may be more specific. Add the product-page context, for example `.single-product .alg-wc-civs-term { ... }`, or increase specificity rather than reaching for `!important`.

Swatches only styled on product pages?

VARIATION SWATCHES

See every feature and the pricing on the Variation Swatches plugin page.

View plugin →

By default the plugin loads its CSS on single product pages only. If you want styled swatches on shop or category pages too, turn off **Scripts Only on Product Page** at **WooCommerce > Settings > Variation swatches**.
