Tools and Admin Options

How to · https://wpfactory.com/docs/tools-and-admin-options/

The Admin & Advanced section of MSRP (RRP) Pricing for WooCommerce gives you bulk tools for populating MSRP and options for managing MSRP inside the WooCommerce admin. Find it under **WPFactory > MSRP** (also reachable at **WooCommerce > Settings > MSRP**), on the **Admin & Advanced** section.

Tools

- **Copy all products prices to MSRP:** sets each product's MSRP to its current price in one action. A quick way to seed MSRP values, which you can then adjust. This is free.
- **Delete all products MSRP meta:** permanently removes all stored MSRP data (all `_alg_msrp` meta). Use with care. This is free.
- **Bulk MSRP price converter tool:** opens a dedicated tool for changing product prices in bulk (multiply, add, and choose regular or sale price). Opening and running the tool is free; its category and tag targeting and its rounding controls are Pro. See the Bulk MSRP Price Converter guide.

Admin Options

These options are all free.
