Variation Swatches Settings Reference

References · https://wpfactory.com/docs/variation-swatches-settings-reference/

This is the complete list of settings for Variation Swatches for WooCommerce - Color & Image Swatches, with each option's exact ID, type, default, and free or Pro status. All of them live on one screen at **WooCommerce > Settings > Variation swatches**.

General options

Label	Option ID	Type	Default	Free/Pro
Enable Plugin	`alg_wc_civs_enable`	Checkbox	Yes	Free
Scripts Only on Product Page	`alg_wc_civs_scripts_on_product_page`	Checkbox	Yes	Free
Only valid combinations	`alg_wc_civs_possible_combinations`	Checkbox	Yes	Pro
Add images on Gallery	`alg_wc_civs_add_images_on_gal`	Checkbox	Yes	Pro

Select2 section

Label	Option ID	Type	Default	Free/Pro
Use Select2	`alg_wc_civs_use_select_2`	Checkbox	No	Pro
Load Select2	`alg_wc_civs_enqueue_select_2`	Checkbox	Yes	Pro

Term-level fields (per attribute value)

These are not on the settings screen. They appear on each attribute term under **Products > Attributes > Configure terms**, and only when the attribute type calls for them.

Attribute type	Field	Term meta key
Color	Color picker	`alg_wc_civs_term_color_color`
Image	Image uploader	`alg_wc_civs_term_image_image_id`
Label	Text field	`alg_wc_civs_term_label_label`
