Set Add to Cart Button Labels per Language (WPML and Polylang)

How to · https://wpfactory.com/docs/woocommerce-add-to-cart-labels-per-language/

To show different Add to Cart button text per language, use the `[alg_wc_atcbl_translate]` shortcode from Change Add to Cart Button Text for WooCommerce inside any label field. It works with both WPML and Polylang, and it is available in the free version.

Before you start

- WooCommerce, active.
- WPML or Polylang installed and configured with your languages.
- At least one section of the plugin enabled (for example All Products) so you have a label field to type into.

The two ways to write it

Both forms take a comma-separated, case-insensitive list of language codes.

Attribute form (all in one tag)

```
[alg_wc_atcbl_translate lang="EN,DE" lang_text="Add to cart" not_lang_text="In den Warenkorb"]
```

Shows `lang_text` when the current language is one of the listed codes, and `not_lang_text` otherwise.

Enclosing form (two tags)

```
[alg_wc_atcbl_translate lang="EN"]Add to cart[/alg_wc_atcbl_translate][alg_wc_atcbl_translate not_lang="EN"]In den Warenkorb[/alg_wc_atcbl_translate]
```

- `lang="EN"`: the wrapped text shows only when the current language matches.
- `not_lang="EN"`: the wrapped text shows for every language except the listed ones.

Step-by-step

1. Go to **WPFactory > Add to Cart Button Labels** (also reachable at **WooCommerce > Settings > Add to Cart Button Labels**).
2. Open the section you want (for example All Products) and enable it.
3. In the **Single product page** field, paste one of the forms above with your languages and wording.
4. Repeat for **Shop page** if needed, then click **Save changes**.
5. Switch your site language and reload a product to confirm each label.

Tips

- List several languages together: `lang="EN,FR,DE"`.
- Use the attribute form for short labels and the enclosing form when the text contains commas or other shortcodes.
- You can combine it with other shortcodes, for example a translated prefix plus `[alg_wc_atcbl_product_price]`.

WPFACTORY ACCOUNT

Per-language labels are free. Change Add to Cart Button Text for WooCommerce Pro adds unlimited category, tag, user role and user groups, plus on-sale labels.
