WooCommerce Advanced Reporting and Statistics Settings Reference

References · https://wpfactory.com/docs/woocommerce-advanced-reporting-settings-reference/

This reference lists every setting in WooCommerce Advanced Reporting and Statistics, with its exact label, option ID and default. All of these live on the **Settings** tab at **WPFactory > Reporting & Statistics**, split across three sections: General Settings, Email and Orders Custom Report.

General Settings

Label	Option ID	Type	Default
Selected default status	`webdWoocommerceReportingStatisticsPro_status`	Multi-select (order statuses)	Completed, Processing, On hold, Refunded
Plugin Access Role (apart from admin and shop manager)	`webdWoocommerceReportingStatisticsProaccessRole`	Select (user role)	None
Orders to query each time	`webdWoocommerceReportingStatisticsProqueryLimit`	Number	`500`
Orders per page	`wpfactory_wc_ars_pro_order_limit`	Number	`100`
Months per page	`wpfactory_wc_ars_pro_month_limit`	Number	`10`

Label	Option ID	Type	Default
Years per page	`wpfactory_wc_ars_pro_year_limit`	Number	`10`
Query by Billing City	`webdWoocommerceReportingStatisticsProquerybyCity`	Checkbox	Off
Query by Billing Country	`webdWoocommerceReportingStatisticsProquerybyCountry`	Checkbox	Off
Query by Payment Method	`webdWoocommerceReportingStatisticsProquerybyPayment`	Checkbox	Off
Query by Product	`webdWoocommerceReportingStatisticsProquerybyProduct`	Checkbox	Off
Query by Category	`webdWoocommerceReportingStatisticsProquerybyCategory`	Checkbox	Off
Query by Customer	`webdWoocommerceReportingStatisticsProquerybyUser`	Checkbox	Off
Query by Paid Date	`webdWoocommerceReportingStatisticsProquerybyPaidDate`	Checkbox	Off

Selected default status is the status set every report uses when you do not pick a specific status. The **Query by** options each add a filter dropdown to the report toolbar; see the **report filters** guide. **Orders to query each time** controls how many orders are loaded per batch, while **Orders per page**, **Months per page** and **Years per page** control pagination in the respective tables.

Email

Label	Option ID	Type	Default

Send Completed Orders Report	`webdWoocommerceReportingStatisticsProsendReport`	Yes / No	No
Email Frequency	`webdWoocommerceReportingStatisticsProemailFrequency`	Daily / Weekly / Monthly	Weekly
Emai for Report	`webdWoocommerceReportingStatisticsProemailForReport`	Text (email)	Site admin email

See the **automated email reports** guide for how the schedule works and what the email contains. The recipient label is spelled **Emai for Report** in the plugin.

Orders Custom Report

Setting	Option ID	What it does
Order fields to display	`webdWoocommerceReportingStatisticsPro_custom_fields`	The set of order fields shown as columns in the Orders table on the General report.

See the **custom orders report** guide for how to choose fields and export the result.

WOOCOMMERCE ADVANCED REPORTING AND STATISTICS

WooCommerce Advanced Reporting and Statistics turns your store data into clear, exportable reports, sales forecasts and stock alerts.
