Add the Amount Left for Free Shipping Widget

How to · https://wpfactory.com/docs/woocommerce-amount-left-free-shipping-widget/

The Free Shipping Bar: Amount Left for Free Shipping for WooCommerce registers a widget so you can show the amount left for free shipping in any widget area, such as a sidebar or footer. The widget is free.

Add the widget

1. Go to **Appearance > Widgets** in your WordPress dashboard.
2. Add the **Amount Left for Free Shipping** widget to the widget area you want.
3. Set the fields below and save.

Field	Description
Title	Optional heading shown above the message.
Content	The message text. Accepts the plugin placeholders such as `%amount_left_for_free_shipping%` and `%progress_bar%`. Defaults to "%amount_left_for_free_shipping% left for free shipping".

Prefer a shortcode?

If your theme uses a block-based widget area or you want the message inside page content, use the shortcode instead:

```
[alg_wc_left_to_free_shipping content="%amount_left_for_free_shipping% left for free shipping"]
```

See the Free shipping shortcodes and widget reference for all shortcode attributes.

Note: the widget shows nothing on pages where there is no cart context or when free shipping rules hide the message. On cached or fragment-loaded areas, enable Advanced > AJAX (Pro) so the

amount refreshes as the cart changes.

AMOUNT LEFT FOR FREE SHIPPING

The widget is free. Amount Left for Free Shipping Pro adds AJAX updates and extra display sections.
