How to Auto-Complete Offers After Purchase

How to · https://wpfactory.com/docs/woocommerce-auto-complete-offers/

To auto-complete offers after purchase in Name Your Price: Make Your Own Offer for WooCommerce, go to WPFactory > Price Offers > Automation and choose one or more triggers under Auto-Complete Options, such as Checkout order processed or Payment complete. Auto-Uncomplete Options revert completed offers when an order is cancelled. These options are free.

Where the settings live

Go to **WPFactory > Price Offers** (also reachable at **WooCommerce > Settings > Price Offers**) and open the **Automation** section. Scroll to **Auto-Complete Options** and **Auto-Uncomplete Options**.

Auto-Complete triggers (free)

Triggers (`alg_wc_po_auto_complete`) decides which WooCommerce events mark a linked offer as completed. Choose one or more:

- **Checkout order processed** (default) - as soon as the order is placed at checkout.
- **Payment complete** - when payment is confirmed.
- **Order status completed** - when the order reaches the Completed status.

> **Note:** the **Payment complete** and **Order status completed** triggers only work for orders created with plugin version 3.4.0 or later, because earlier orders did not store the offer link needed to match them.

Auto-Uncomplete triggers (free)

Triggers (`alg_wc_po_auto_uncomplete`) decides which events revert a completed offer back to its previous state. Choose one or more:

- **Cancelled order** (default).

- **Order status cancelled**.

Why this matters

Keeping offer statuses in sync with orders means your **Offers** dashboard reflects reality: accepted offers that turned into paid orders show as completed, and offers whose orders were cancelled reopen so you can follow up.

NAME YOUR PRICE

Auto-complete and auto-uncomplete are free. Name Your Price: Make Your Own Offer for WooCommerce Pro adds per-product targeting and automatic accept/reject rules.
