Show a Fallback Payment Method for Conflicting Carts

Pro Features · https://wpfactory.com/docs/woocommerce-fallback-payment-gateway/

To show a fallback payment method for conflicting carts in Payment Methods by Product & Country for WooCommerce Pro, go to WPFactory > Payment Gateways per Products > General, tick Fallback gateway > Enable under Advanced Options, choose the fallback gateway, and save. It appears only when your rules would leave the cart with no gateway.

When the fallback appears

The fallback gateway is shown **only** when your combined rules would otherwise leave the cart with zero available gateways. It is not a default applied whenever a product has no rule, and it does not override carts that already have at least one valid gateway. Think of it as a safety net for the conflict case, for example a mixed cart where one product allows only Gateway A and another allows only Gateway B.

Before you start

- Payment Methods by Product & Country for WooCommerce Pro.

Enable it

1. Go to **WPFactory > Payment Gateways per Products** (also reachable at **WooCommerce > Settings > Payment Gateways per Products**) and open the **General** tab.
2. Under **Advanced Options**, tick **Fallback gateway > Enable**.
3. In **Choose fallback gateway**, select the gateway to fall back to (for example Direct Bank Transfer).
4. Click **Save changes**.

Options

Setting	Option ID	Default
Fallback gateway (Enable)	`alg_wc_pgpp_advanced_fallback_gateway_enabled`	No
Choose fallback gateway	`alg_wc_pgpp_advanced_fallback_gateway`	(none)

> **Note:** Pick a gateway that works for any order, such as bank transfer or cash on delivery, so the fallback never lands the customer on a method that cannot process the cart. If you leave **Choose fallback gateway** empty, nothing is shown in the conflict case.

Test it

Create two products with opposing rules (each restricted to a different gateway), add both to a cart, and open checkout. With the fallback off you would see no methods; with it on you see your chosen fallback.

PAYMENT GATEWAYS PER PRODUCTS

The fallback gateway is a Pro feature of Payment Gateways per Products.
