Hide Other Shipping Methods When Free Shipping Is Available

How to · https://wpfactory.com/docs/woocommerce-hide-shipping-methods-free-shipping/

The Free Shipping Bar: Amount Left for Free Shipping for WooCommerce can automatically hide paid shipping methods once a customer qualifies for free shipping, so they are not tempted to pick a slower paid option. This is a free feature that lives in the General section.

Go to **WPFactory > Left for Free Shipping** (also reachable at **WooCommerce > Settings > Amount Left for Free Shipping**) and open the **General** section, then find **Hide shipping methods**.

Options

Label	Option ID	Default

Hide other shipping methods when free shipping is available	`alg_wc_left_to_free_shipping_hide_shipping_methods`	No
Visible shipping methods (kept when free shipping is reached)	`alg_wc_left_to_free_shipping_visible_shipping_methods_on_hide`	Free shipping

Step-by-step

1. Enable **Hide other shipping methods when free shipping is available**.
2. In **Visible shipping methods**, select the methods that should stay in the list once free shipping is reached. This is a multiselect of the methods registered in your store, not a single "free shipping method" picker.
3. Save changes, then add products to a test cart until free shipping is reached and confirm the other methods disappear.

Note: free shipping is treated as "available" when the plugin cannot find any amount left to reach it. If you use a non-standard free shipping method, set the threshold under the Manual min amount section so the plugin knows when to hide the others.

AMOUNT LEFT FOR FREE SHIPPING

This feature is free. Amount Left for Free Shipping Pro adds targeted hiding of the message itself by category and user role, plus AJAX updates.
