How to Sort Order Statuses in WooCommerce

How to · https://wpfactory.com/docs/woocommerce-order-status-sorting/

To sort order statuses in WooCommerce with Additional Custom Order Status for WooCommerce, go to WPFactory > Order Status (also reachable at WooCommerce > Settings > Order Status) and open the Sorting section. Choose Default, By title (ascending) or Custom for each of four admin places, and for Custom list one status slug per line. Sorting is free.

Where to set sorting

Go to **WPFactory > Order Status** (also reachable at **WooCommerce > Settings > Order Status**) and open the **Sorting** section.

The four sorting options

You can sort each of these independently:

Setting	Option ID	Default

Admin order edit page dropdown box	`wfwp_wc_order_status_sorting`	Default
Admin order list action buttons	`wfwp_wc_order_status_sorting_order_list_actions`	Default
Admin order preview action buttons	`wfwp_wc_order_status_sorting_order_preview_actions`	Default
Admin order bulk actions	`wfwp_wc_order_status_sorting_bulk_actions`	Default

Sorting modes

Each setting offers three modes:

- **Default**: keep the standard WooCommerce order.
- **By title (ascending)**: sort alphabetically by status name.
- **Custom**: set your own order.

Using custom sorting

1. Set the sorting option to **Custom**.
2. In its **Custom sorting** box, enter one status slug per line, in the order you want.
3. Open the **Custom sorting tips** panel to see the exact list of your current status slugs, then copy them into the box in your preferred order.
4. Save changes.

> **Note:** custom sorting for the "Admin order edit page dropdown box" is the most reliable. If a custom list does not take effect for the list, preview, or bulk contexts, use "By title (ascending)" there instead.

CUSTOM ORDER STATUS

Sorting is free. Additional Custom Order Status for WooCommerce Pro adds automated emails on status change.
