How to Display a Price Unit Next to the Price

How to · https://wpfactory.com/docs/woocommerce-price-unit/

A price unit is short text shown beside the price, such as "per KG" or "per meter," so customers understand what the price refers to. You add it in the Price Unit section of the Min Max Step Quantity Limits Manager for WooCommerce. A global value and a per-category value are free.

Steps

1. Go to **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**).
2. Open the **Price Unit** section and tick **Price Unit** to enable it.
3. In the **Price Unit** text field (`wpfmmsq_qty_price_unit`), enter your text, for example `per KG` .
4. To let categories set their own unit, tick **Allow price unit on category level**.

5. Click **Save changes**.

Options reference

Label	Option ID	Default	Free/Pro
Price Unit (enable)	`wpfmmsq_qty_price_unit_enabled`	No	Free
Price Unit text	`wpfmmsq_qty_price_unit`	(empty)	Free
Allow price unit on category level	`wpfmmsq_qty_price_unit_category_enabled`	No	Free
Allow price unit on product level	`wpfmmsq_qty_price_unit_product_enabled`	No	Pro
Show on archive pages	`wpfmmsq_qty_price_unit_show_archive_enabled`	No	Pro

> **Note:** the Price Unit does not display if **Total Price by Quantity** is enabled with its position set to *Instead of the price*, because that template replaces the price output.

QUANTITY MANAGER

The global and category unit are free. Min Max Step Quantity Limits Manager for WooCommerce Pro adds product-level units, units on shop/archive pages, and units in order emails.
