Showing Processing and Complete Buttons on More Orders

How to · https://wpfactory.com/docs/woocommerce-processing-complete-action-buttons/

To show the Processing and Complete buttons on more orders, go to WPFactory > Order Status (also reachable at WooCommerce > Settings > Order Status), open the General section, and under Admin Order List Actions Buttons check Override, select the statuses that should show each button, and save. This is free in Additional Custom Order Status for WooCommerce.

The default behavior

By default, WooCommerce shows the **Processing** action only on pending and on-hold orders, and the **Complete** action only on pending, processing, and on-hold orders. The override lets you widen or change that.

Where to set it

Go to **WPFactory > Order Status** (also reachable at **WooCommerce > Settings > Order Status**), open the **General** section, and find **Admin Order List Actions Buttons**.

Options

Setting	Option ID	Default
Processing: Override	`wfwp_wc_order_status_admin_order_actions_processing_override`	No
Processing: Order statuses	`wfwp_wc_order_status_admin_order_actions_processing_has_status`	Pending, On hold
Complete: Override	`wfwp_wc_order_status_admin_order_actions_complete_override`	No
Complete: Order statuses	`wfwp_wc_order_status_admin_order_actions_complete_has_status`	Pending, On hold, Processing

Steps

1. Check **Override** for Processing, Complete, or both.
2. In the matching **Order statuses** box, select the statuses that should show that button.
3. Save changes. The button now appears on orders in the statuses you chose.

> **Note:** the override only adds a button where WooCommerce has not already placed one. It does not remove the standard buttons.

CUSTOM ORDER STATUS

This feature is free. Additional Custom Order Status for WooCommerce Pro adds automated emails on status change.
