Template Placeholders and Styling Reference

References · https://wpfactory.com/docs/woocommerce-products-per-page-placeholders/

The Number of Products per Page - Pagination Manager for WooCommerce plugin builds the selector from a text template with placeholders, plus a few styling fields. This reference lists every placeholder and styling option in Products per Page, with its exact behavior.

These fields live in the Template Options block at **WPFactory > Products per Page** (also reachable at **WooCommerce > Settings > Products per Page**).

Placeholders

Placeholder	Outputs
`%from%`	The first product number shown on the current page
`%to%`	The last product number shown on the current page
`%total%`	The total number of matching products
`%dropdown%`	The selector as an HTML `<select>` dropdown

Placeholder	Outputs
`%radio%`	The selector as a set of radio buttons
`%select_form%`	Deprecated alias of `%dropdown%`. Use `%dropdown%` instead

The default template is: `Products <strong>%from% - %to%</strong> from <strong>%total%</strong>. Products on page %dropdown%`. Include either `%dropdown%` or `%radio%` so shoppers have a control to interact with.

Styling and wrapper fields

Field	Option ID	Applies to
Selector class	`alg_wc_products_per_page_select_class`	Each `<input>` for `%radio%`; the `<select>` for `%dropdown%`
Selector style	`alg_wc_products_per_page_select_style`	Same elements as Selector class, as inline CSS
Before HTML	`alg_wc_products_per_page_before_html`	Markup printed before the form
After HTML	`alg_wc_products_per_page_after_html`	Markup printed after the form
Radio glue	`alg_wc_products_per_page_radio_glue`	String placed between radio buttons (default is a single space)

Example templates

A compact dropdown label:

```
Show %dropdown% of %total% products
```

Radio buttons with a lead-in:

```
Products per page: %radio%
```
