Show the Products per Page Selector as Radio Buttons

How to · https://wpfactory.com/docs/woocommerce-products-per-page-radio-buttons/

Show the selector as radio buttons instead of a dropdown

To show the products per page selector as radio buttons in Number of Products per Page - Pagination Manager for WooCommerce, go to WPFactory > Products per Page, edit the Template field in the Template Options block, replace %dropdown% with %radio%, and save. Use the Radio glue field to set the separator between buttons.

Steps

1. Go to **WPFactory > Products per Page** (also reachable at **WooCommerce > Settings > Products per Page**).
2. In the Template Options block, edit the **Template** field (option id `alg_products_per_page_text`).
3. Replace `%dropdown%` with `%radio%`. For example: `Products per page: %radio%`.
4. Save changes.

Space the buttons with Radio glue

The **Radio glue** field (option id `alg_wc_products_per_page_radio_glue`) sets the string placed between each radio button. The default is a single space. To put each option on its own line, enter `<br>`; to separate with a pipe, enter `|`.

Style the buttons

The **Selector class** and **Selector style** fields apply to each radio `<input>` element when you use `%radio%` (they apply to the `<select>` element when you use `%dropdown%`). Add a class here and target it from the Custom CSS field in the Advanced section for finer styling.

Tip: radio buttons work best with a short options list. If you show many choices, a dropdown keeps the layout tidy.

PRODUCTS PER PAGE

Both selector styles are free. Number of Products per Page - Pagination Manager for WooCommerce Pro adds an editable options list and a Products per Page widget.
