Limit the Products per Page Selector to Specific Pages

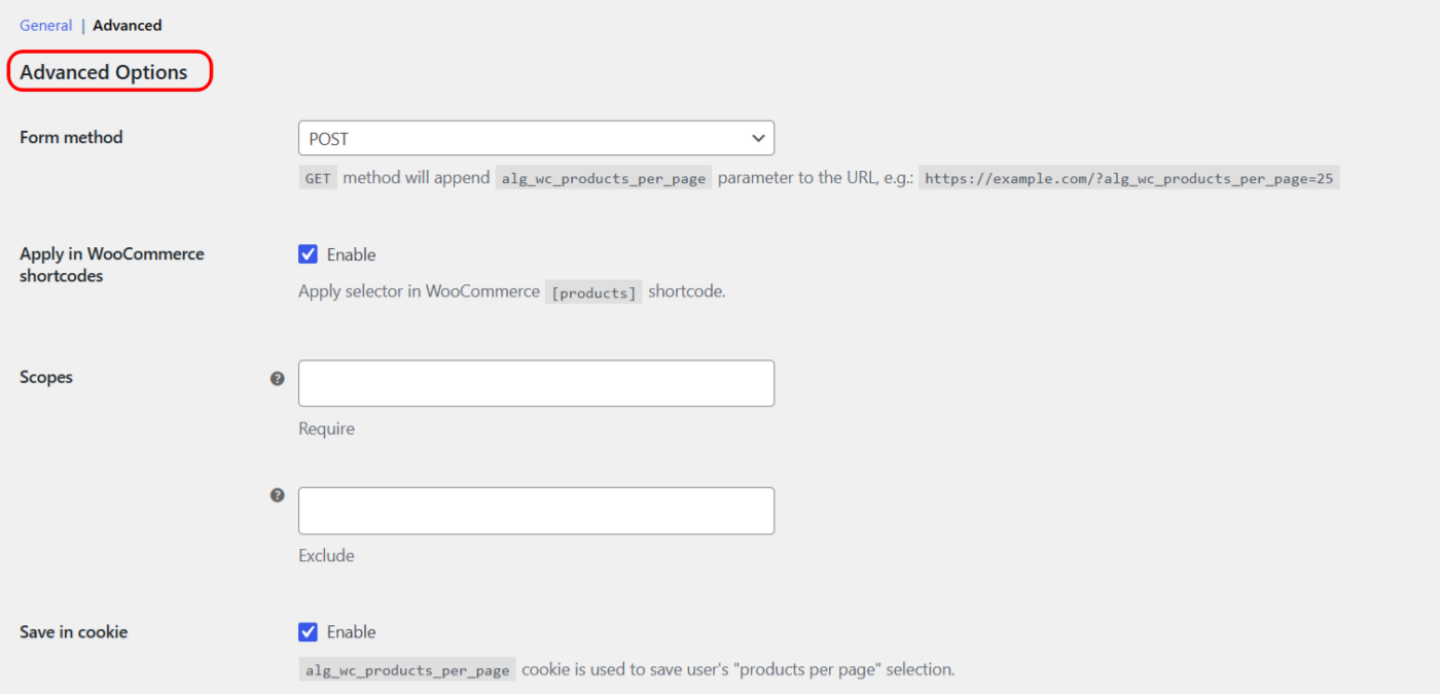

How to · https://wpfactory.com/docs/woocommerce-products-per-page-scopes/

Show the selector only where you want it

To limit the products per page selector to specific pages in Number of Products per Page - Pagination Manager for WooCommerce, go to WPFactory > Products per Page > Advanced and use the Scopes options. Add page types to Require to show it only there, or to Exclude to keep it off them. Exclude takes precedence.

Where to set scopes

Go to **WPFactory > Products per Page** (also reachable at **WooCommerce > Settings > Products per Page**), then open the **Advanced** section and find the **Scopes** options.

Require and Exclude

Setting	Option ID	Effect
Require	`alg_wc_products_per_page_scopes[require]`	Apply only on the selected page types
Exclude	`alg_wc_products_per_page_scopes[exclude]`	Never apply on the selected page types

Both lists are empty by default, which means the selector applies everywhere. Exclude takes precedence: if a page matches both lists, the selector is not applied.

Available page types

- Product category (`is_product_category`)
- Product tag (`is_product_tag`)
- Product taxonomy (`is_product_taxonomy`)
- Shop (`is_shop`)
- Archive (`is_archive`)
- Home (`is_home`)
- Front page (`is_front_page`)
- Single (`is_single`)
- Singular (`is_singular`)

Examples

- **Shop and categories only:** add Shop and Product category to **Require**.
- **Everywhere except the front page:** leave Require empty and add Front page to **Exclude**.

PRODUCTS PER PAGE

Scopes are free. Number of Products per Page - Pagination Manager for WooCommerce Pro adds an editable options list and a Products per Page widget.
