How to Restrict Payment Gateways for Accepted Offers

How to · https://wpfactory.com/docs/woocommerce-restrict-payment-gateways-offers/

To restrict payment gateways for accepted offers in Name Your Price: Make Your Own Offer for WooCommerce, go to WPFactory > Price Offers > Advanced, select gateways under Payment gateways, and set the action to Exclude or Restrict. The rule applies only when the cart contains an item from an accepted offer. This feature is free.

Where the settings live

Go to **WPFactory > Price Offers** (also reachable at **WooCommerce > Settings > Price Offers**) and open the **Advanced** section.

Options (all free)

Label	Option ID	Default
Payment gateways	`alg_wc_po_payment_gateways`	Empty (ignored)
Exclude or Restrict	`alg_wc_po_payment_gateways_action`	Exclude

How it works

1. Under **Payment gateways**, select the gateways you want to control. If you leave it empty, the feature does nothing.
2. Set the action:
   - **Exclude:** the selected gateways are hidden at checkout when an accepted offer is in the cart.
   - **Restrict:** only the selected gateways are available; all others are hidden.

The rule applies only when the cart contains an item that came from an accepted price offer. Regular carts are unaffected.

Related advanced options

- **Exclude price offers from coupons** (`alg_wc_po_exclude_cart_items_from_coupons`, default enabled): stops coupons from further discounting a negotiated price.
- **Send emails in background** (`alg_wc_po_send_emails_in_background`): queues offer emails through the WooCommerce Action Scheduler.
- **REST API** (`alg_wc_po_rest_api_enabled`): exposes offers over the REST API. See the Offers REST API reference.

NAME YOUR PRICE

Payment gateway control is free. Name Your Price: Make Your Own Offer for WooCommerce Pro adds per-product targeting and automatic accept/reject rules.
