How to Show a Total Price by Quantity in WooCommerce

How to · https://wpfactory.com/docs/woocommerce-total-price-by-quantity/

Show a total price that updates with quantity

Total Price by Quantity displays the running total for the chosen quantity and updates it live as the customer changes the amount. It is ideal for products sold by weight or length. You enable it in the Min Max Step Quantity Limits Manager for WooCommerce, and the core feature is free for simple products.

Steps

1. Go to **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**).
2. Open the **Total Price by Quantity** section and tick **Total Price by Quantity** (`wpfmmsq_qty_price_by_qty_enabled`).

3. For variable products, also tick **Total Price by Quantity for variable product**.
4. Edit the **Template** (default `%price% for %qty% %unit%.`) and choose a **Position** (before, instead of, or after the price, or before/after add to cart).
5. Click **Save changes**.

Template placeholders

Placeholder	Shows
`%price%`	The calculated total for the current quantity.
`%qty%`	The selected quantity.
`%unit%`	The unit label (product, then category, then global).

> **Note:** if **Position** is set to *Instead of the price*, the separate **Price Unit** feature is overridden by this template.

Options reference

Label	Option ID	Default	Free/Pro
Total Price by Quantity (enable)	`wpfmmsq_qty_price_by_qty_enabled`	No	Free
Template	`wpfmmsq_qty_price_by_qty_template`	%price% for %qty% %unit%.	Free
Position	`wpfmmsq_qty_price_by_qty_position`	Instead of the price	Free
Unit on product / category level	`wpfmmsq_qty_price_by_qty_unit_input_enabled`	No	Pro

QUANTITY MANAGER

The core feature is free. Min Max Step Quantity Limits Manager for WooCommerce Pro adds per-product, per-category and per-attribute units, and price by quantity on shop and category pages.
