

HB Education

HB Education Theme is a **simple, clean, beautifully** designed responsive WordPress **Education WordPress Theme**. It is minimal but mostly used features will help you setup your website easily and quickly. Full width layout, featured slider, services/features layout, blog layout, social media integration, full width page layout and woocommerce ready. Fully responsive, cross-browser compatible, SEO friendly, **HB Education** Theme is multi-purpose and is suitable for School, College, University. Highest level of compatibility with mostly used WP plugins. Great customer support via online chat, email, support forum.

Theme Installation

From WordPress Dashboard

- Login to Wordpress admin panel
- Go to > **Appearance > Themes**
- Click in **Add New > Upload hb-education.zip file > Install Now**
- **Activate the theme**

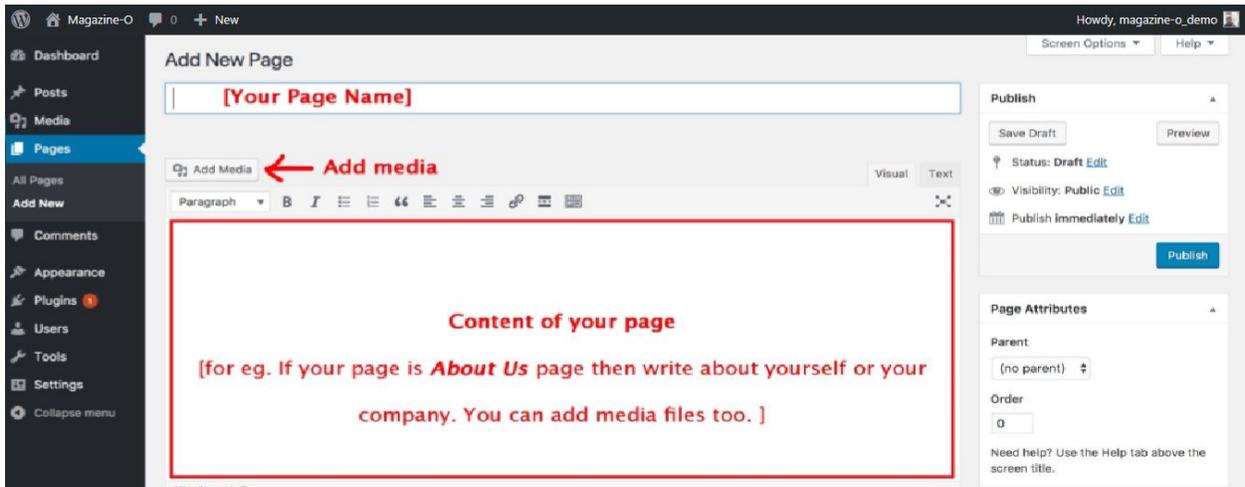

After installing the theme, now you can customize your website as per your preference.

What is page and how to create it?

Pages are static and are not listed by date. Pages do not use tags or categories. An about page is the classic example. Pages can be displayed in the sidebar using the Pages widget, and some themes display pages in the navigation at the top of the site.

-To create page

- Go to dashboard
- Click in **pages > Add New > Follow instructions as below**

- After adding all content, you can publish your page and create necessary pages by same method.

What is category and how to create it?

Categories provide a helpful way to group related posts together, and to quickly tell readers what a post is about. Categories also make it easier for people to find your content. Categories are similar to, but broader than, tags.

How to create categories

- Go to dashboard
- Click in **Posts > Categories**

The screenshot shows the WordPress 'Add New Category' form. The 'Name' field is filled with '[Name of your category for eg:-News]' and the 'Slug' field is filled with '[Slug is the name that appears in url]'. A red arrow points from the 'Add New Category' button to the text 'Click'. Another red arrow points from the 'Add New Category' button to the 'Slug' field with the text 'You can leave blank if you want your Url same as category name'. The right side of the screen shows a table of existing categories, including 'Uncategorized' with a count of 4.

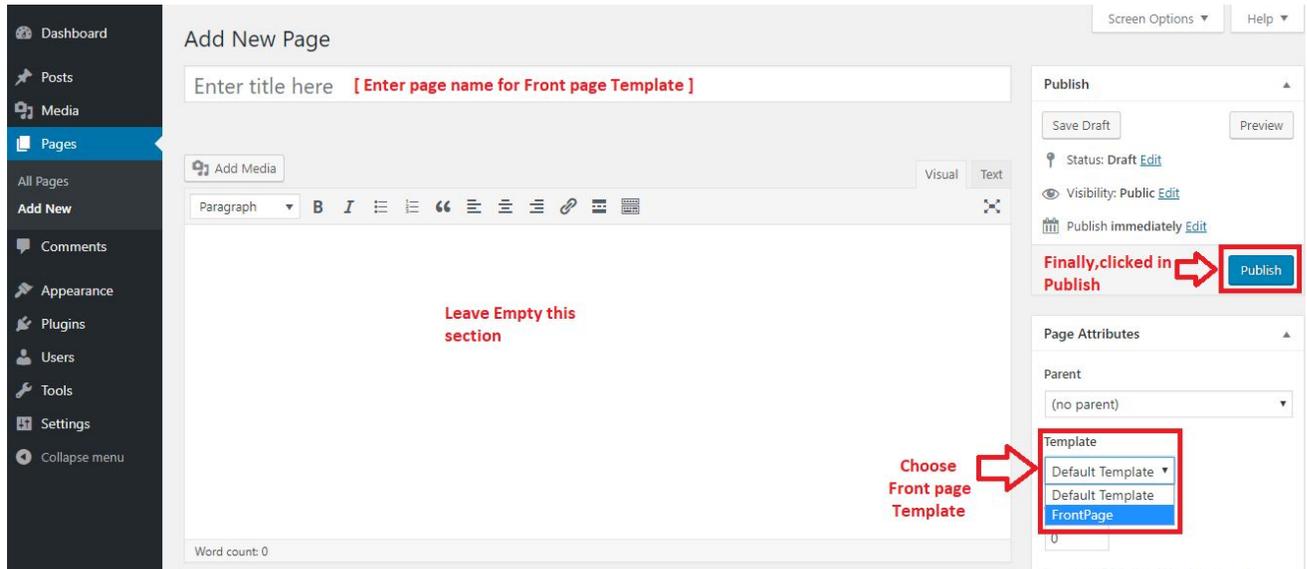

| Name | Description | Slug | Count |
|---------------|-------------|---------------|-------|
| Uncategorized | — | uncategorized | 4 |

- You can put your own slug too, most of the time it is left blank which means name of the category itself will be its slug.
- [For eg. yoursite.com/category/category_name]
- You can put description if you want.
- Now after adding category, your category will appear in right side of the post page.
- You can add more categories in same manner.

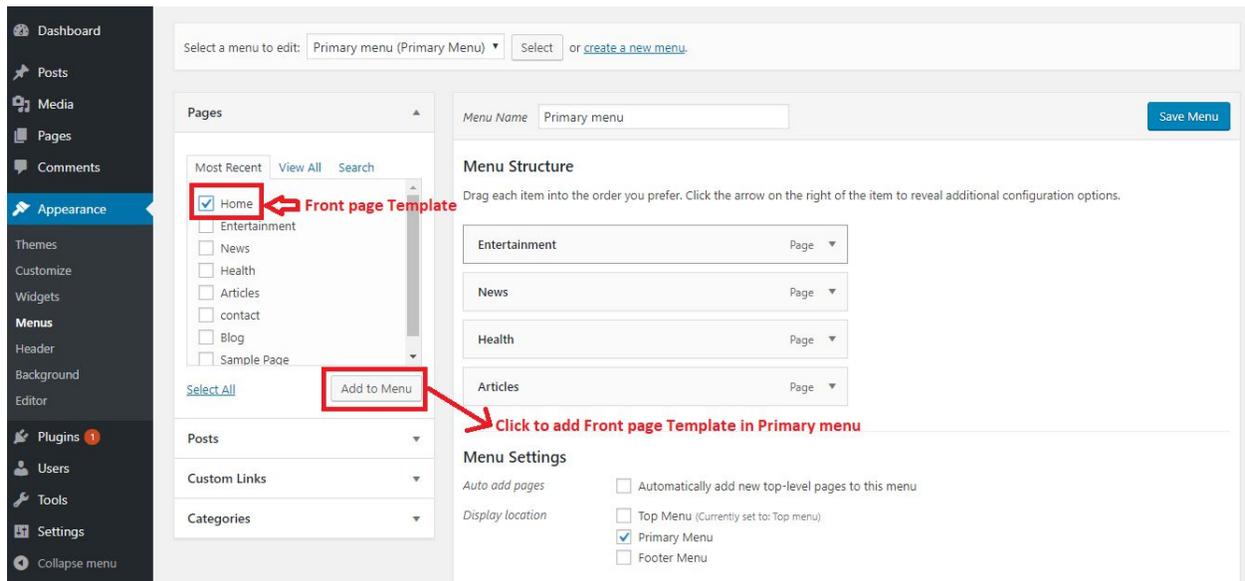

How to set up front page template?

We can describe to set up front page template step by step as below:-

Step 1:- Go to Dashboard > Pages > Add New

Step 2:- Go to Dashboard > Appearance > Menus (setup Front page template in Primary menu)

Step 3:- After click add to menu and move it up, you can see below figure:-

The screenshot shows the WordPress menu editor interface. On the left is a sidebar with navigation options like Dashboard, Posts, Media, Pages, Comments, Appearance, Themes, Customize, Widgets, Menus, Header, Background, Editor, Plugins, Users, Tools, Settings, and Collapse menu. The main area is divided into three sections: Pages, Menu Structure, and Menu Settings. The 'Pages' section lists various pages with checkboxes, and an 'Add to Menu' button is visible. The 'Menu Structure' section shows a list of menu items: Entertainment, News, Health, Articles, and Home. The 'Home' item is highlighted with a red box, and a red arrow points to it with the text 'Front page setup in Primary menu'. The 'Menu Settings' section includes options for 'Auto add pages' and 'Display location', with 'Primary Menu' selected. A 'Save Menu' button is located at the top right.

This screenshot shows the same WordPress menu editor interface as the previous one, but with the 'Home' page moved to the top of the menu structure. The 'Home' item is now the first item in the list, still highlighted with a red box. The 'Menu Settings' section remains the same, with 'Primary Menu' selected. A 'Save Menu' button is visible at the top right.

Step 4:- Click **save menu** button.

Step 6:- Finally, Front page is setup in primary menu Location.

How to create Menus

This theme comes with three menu locations. **Top menus**, **Primary menus** and **Footer menus**.

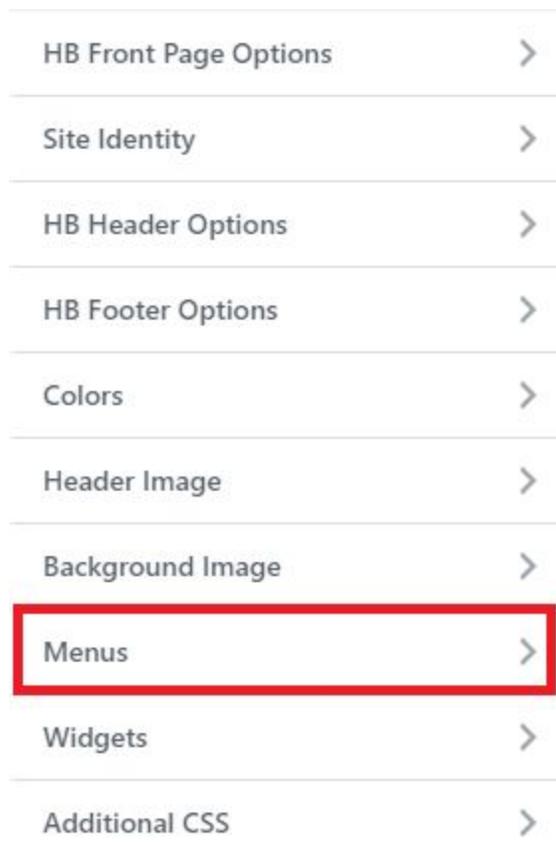

You can create menus in **two ways**.

First Way :-

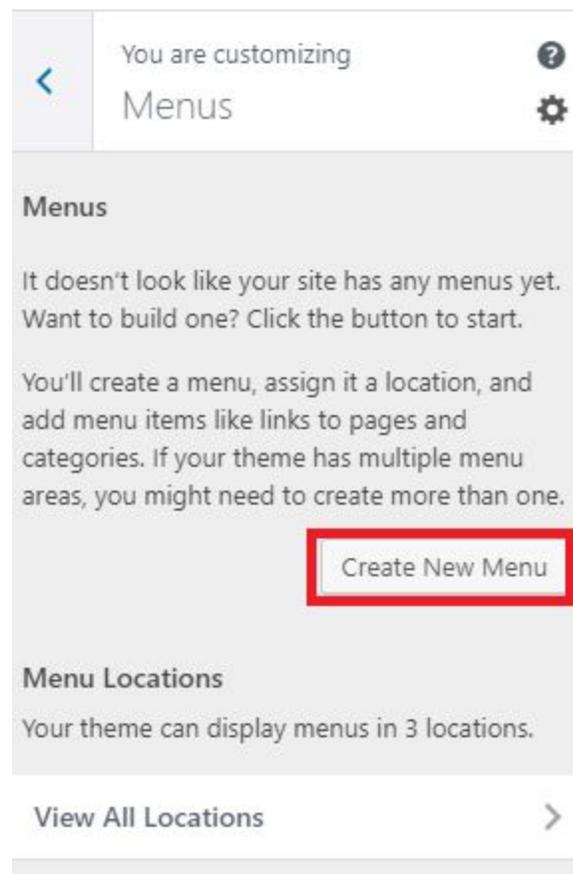

From **Appearance>Customize>Menus>Create New Menu**

First step can be described step by step as below figure:-

Step-1: Click on Menus

Step-2: Click on Create New Menu

Step:-3

Customizing > Menus
New Menu

Menu Name

[Enter Menu Name]

If your theme has multiple menus, giving them clear names will help you manage them.

Menu Locations

Where do you want this menu to appear?
(If you plan to use a menu [widget](#), skip this step.)

Primary

Top Menu

Choose menu Location

Click "Next" to start adding links to your new menu.

Finally, click here

Next

step:-4

Customizing > Menus
Primary menu

Menu Name

Primary menu

Time to add some links! Click "Add Items" to start putting pages, categories, and custom links in your menu. Add as many things as you'd like.

Click here to add item for menu

+ Add Items

Menu Locations

Here's where this menu appears. If you'd like to change that, pick another location.

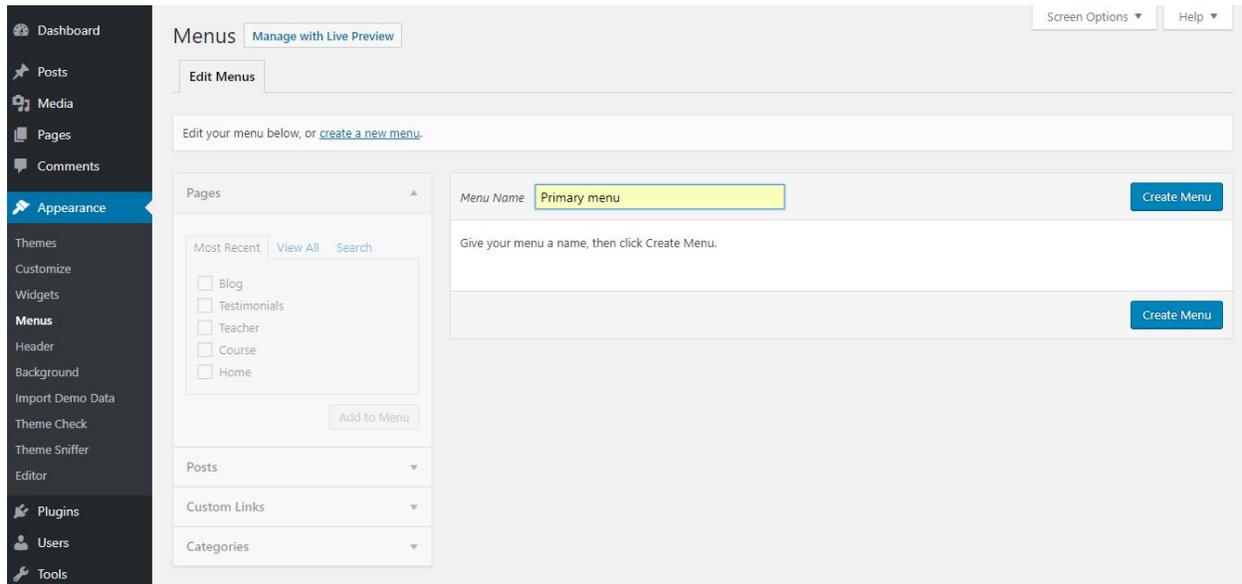

Primary (Current: Primary menu)

Top Menu

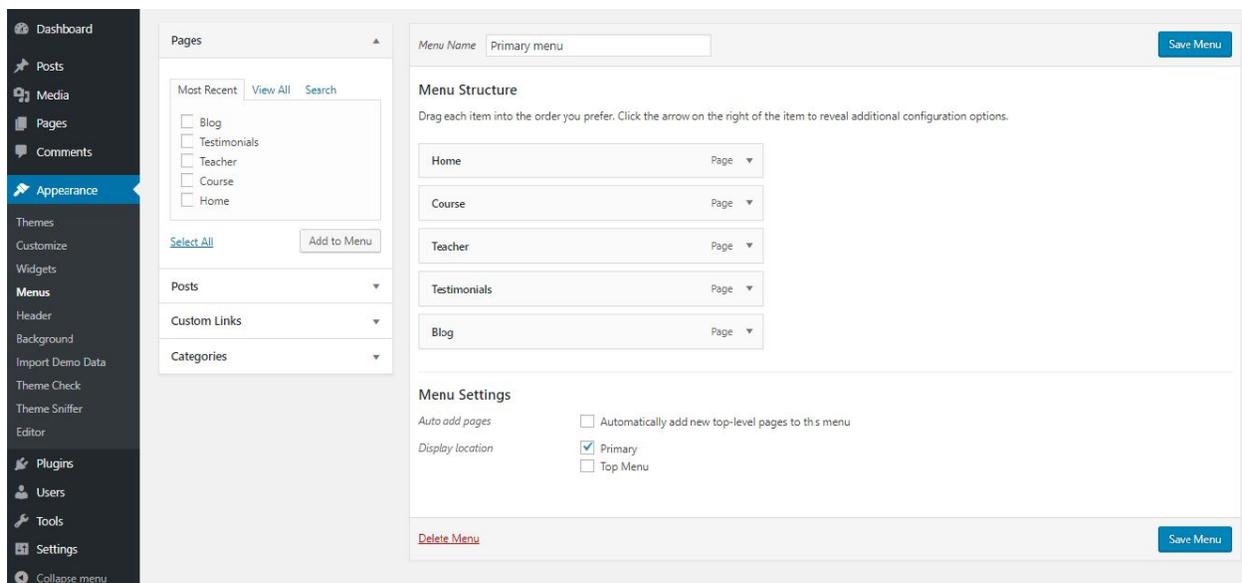

Step-5

Second Way:-

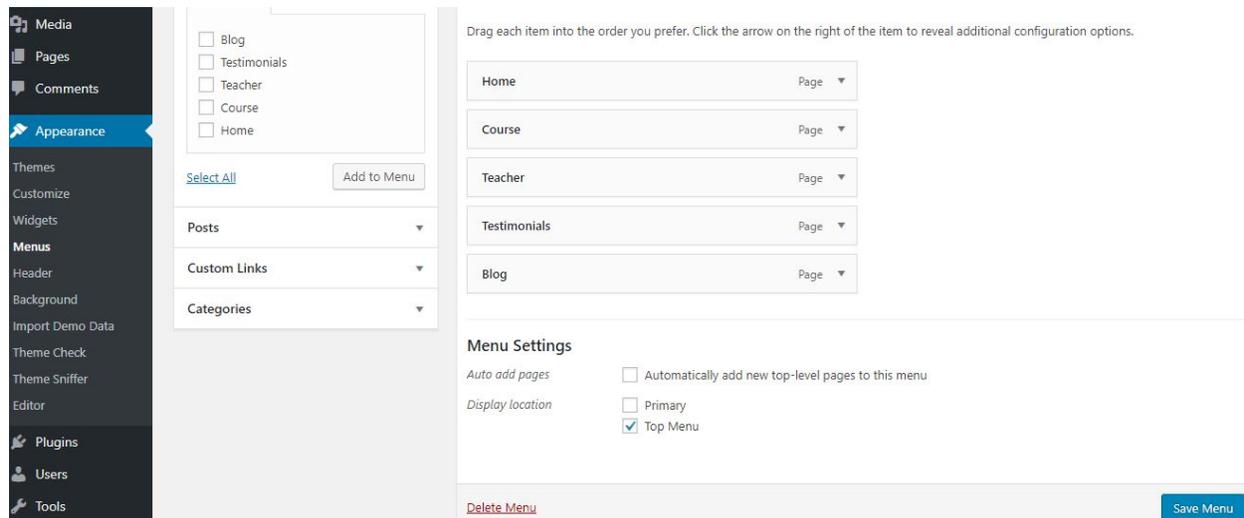

Appearance > Menus. We **RECOMMENDED** second Option for creating menus. First one should be little bit confusing.

- Create **New Menu** [You need to create three menus in this case]
- Give name of the menu [For eg. Top Menu] > **Create Menu**

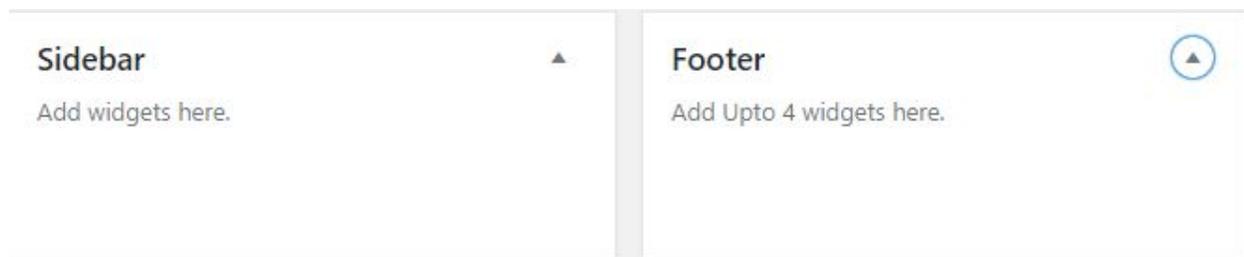

- Now add menus from left side. Whether you want your pages to be menu or Categories. You can also add custom URL as menu.
- Click in **Add to Menu** button.
- Select whether your menus are Primary or Top Menu.
- You need to create different menus for Primary Menus and Top Menus .
- For Top menus you need to check Top Menu in menu setting and Give the name of menu in Menu Name :-

HB Header Options

To change Header **top left announcement** title and Middle **header Address content**.

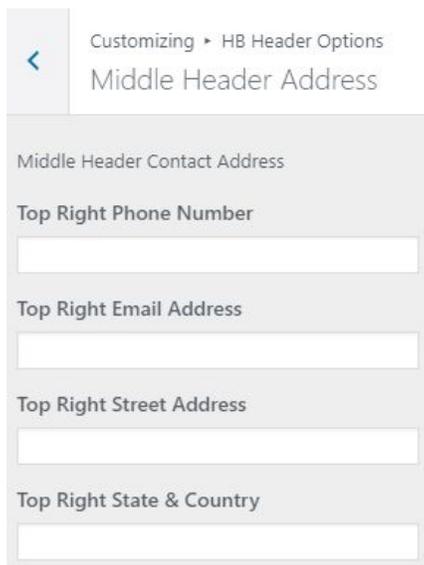

- **HB Header Options > Top Left Announcement**

A screenshot of the "Top Left Announcement" configuration page. The breadcrumb trail is "Customizing > HB Header Options > Top Left Announcement". The page title is "Top Left Announcement". There are two main sections: "Top Left Notice Title" with a text input field, and "Choose Notice Category" with a dropdown menu.

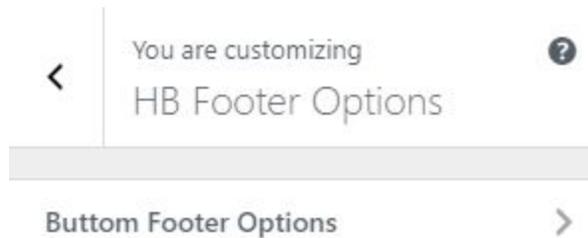

- **HB Header Options > Middle Header Address**

A screenshot of the "Middle Header Address" configuration page. The breadcrumb trail is "Customizing > HB Header Options > Middle Header Address". The page title is "Middle Header Address". There are five sections, each with a text input field: "Middle Header Contact Address", "Top Right Phone Number", "Top Right Email Address", "Top Right Street Address", and "Top Right State & Country".

HB Footer Options

In this section, we can change and update footer buttom content such as Footer **Copyright Text, social Urls and icons.**

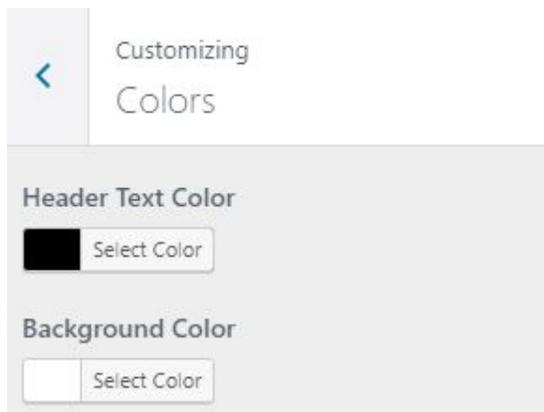

- **HB Footer Options > Buttom Footer Options**

A screenshot of the "Buttom Footer Options" form. The breadcrumb path at the top reads "Customizing > HB Footer Options > Buttom Footer Options". The form is titled "Copyright and Social" and contains the following fields:

- Footer Copyright Text:
- Facebook URL:
- Twitter URL:
- Linked In URL:
- Google Plus URL:
- Pinterest URL:

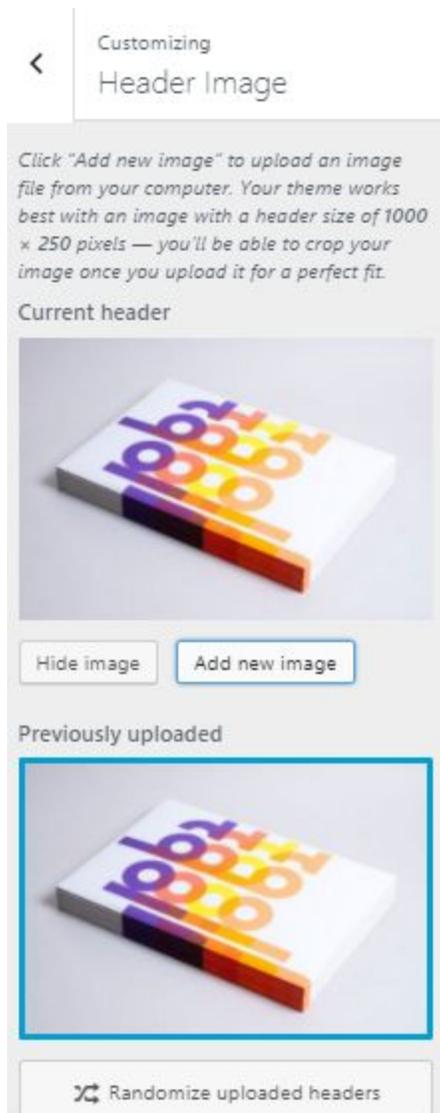

Colors

In this section, we can change and update **header text color** and **background color**.

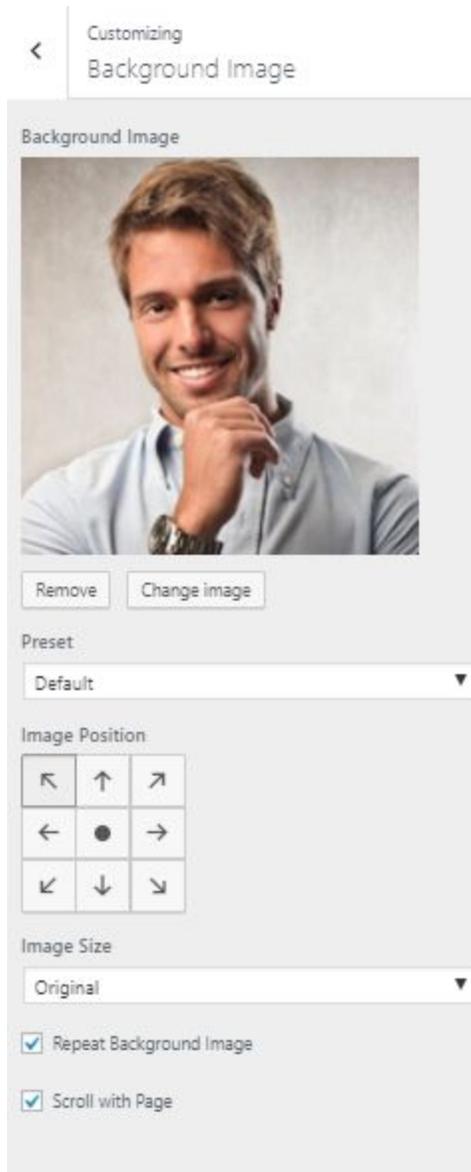

Header Image

In this section, we can change and update header Image.

Background Image

In this section, we can change and update the background image of website.

Menus

You have already created menu from the **Appearance > Menu** option. But you can also manage the position of the menus and add/delete menus from this options.

Widget

You can set your widget from this option too. But you have already set the widget from **Appearance > widget** option.

Homepage setting

You have two options here. If you want your homepage to be static(Same always) them you can choose A static page otherwise, you can choose your latest posts option. In order to set a static page, you need to create a static page from the page section.

Creating a post

Now after all set, you can start writing your post. Follow these steps

- Go to dashboard > **Posts** > **Add New**

The screenshot shows the WordPress 'Add New Post' editor. The main content area is a large text box with a red border containing the text: "Body of your post goes here" and "You can add media files from the Add media options". To the right, there are several panels: "Publish" (with buttons for Save Draft, Preview, and Publish), "Categories" (with checkboxes for Article, Entertainment, News, and Uncategorized), "Tags" (with an input field and an Add button), and "Featured Image" (with a link to Set featured image). Red arrows point from text labels to these elements: "Choose categories" points to the Categories panel, "Include 2/3 tags" points to the Tags input field, and "Upload Featured Image" points to the Featured Image panel.

- Finally, click in publish Button. You can preview your post before actually publish it just make sure everything is ok. If you have not completed writing your post then you can save it as draft.
