

WooCommerce Quantity Rules Setup Checklist

Every quantity and order-limit rule worth configuring, in one place. Tick each rule as you set it up.

How to use this checklist: Quantity rules split into two levels — **product-level** (rules on the quantity field of a single product) and **order-level** (rules on the whole cart). Work through both sections below and check off what applies to your store. Each rule notes the level and the plugin that handles it.

Section 1 · Product-Level Rules

- ☐ **Minimum Quantity** **PRODUCT**
Force customers to buy at least X units. Ideal for wholesale and protecting margins on low-value items.
[Quantity Manager](#)
- ☐ **Maximum Quantity** **PRODUCT**
Cap units per order. Essential for limited stock, flash sales, and limited-edition items.
[Quantity Manager](#)
- ☐ **Step / Increment Quantity** **PRODUCT**
Lock the field to multiples (6, 12, 18...). Perfect for case packs and printing runs.
[Quantity Manager](#)
- ☐ **Default Quantity** **PRODUCT**
Change the loaded quantity from 1 to any value to nudge larger orders and lift AOV.
[Quantity Manager](#)
- ☐ **Fixed / Allowed Quantities** **PRODUCT**
Let customers pick only from a set list (1, 3, 5, 10). Ideal for gift sets and bundles.
[Quantity Manager](#)
- ☐ **Decimal Quantities** **PRODUCT**
Sell in non-whole amounts (0.5 kg, 0.25 m) for weight, length, or volume products.
[Quantity Manager](#)
- ☐ **Quantity Dropdown & Price Unit** **PRODUCT**
Replace the qty input with a dropdown and show units like "per KG" for clarity.
[Quantity Manager](#)

Section 2 · Order-Level Rules

- ☐ **Minimum Order Amount (Sum)** **ORDER**
Set a floor on cart value ("no orders under \$X") to kill unprofitable micro-orders.
[Order Min/Max Amount](#)
- ☐ **Maximum Order Amount (Sum)** **ORDER**
Cap total order value for fraud control or fair stock distribution.
[Order Min/Max Amount](#)
- ☐ **Combined Cart Quantity** **ORDER**
Min or max total items across the whole cart, regardless of which products.
[Order Min/Max Amount](#)
- ☐ **Weight / Volume / Dimension Limits** **ORDER**
Restrict orders by total weight, volume, or size to match courier and packaging limits.
[Order Min/Max Amount](#)
- ☐ **Limits by User Role** **ORDER**
Different min/max for wholesale vs retail roles in the same store.
[Order Min/Max Amount](#)
- ☐ **Limits by Payment / Shipping Method** **ORDER**
Set thresholds per gateway or shipping method (e.g. min \$50 for cash on delivery).
[Order Min/Max Amount \(Pro\)](#)
